Partha Teja Malladi

425-505-8272 | partha.malladi@gmail.com | linkedin.com/in/pmalladi | github.com/parthaMalladi | US Citizen

Education

University of Massachusetts Amherst Sep 2025 - May 2027 (Expected)
Master of Science in Computer Science *GPA: 3.85/4.0*

University of Washington September 2022 - June 2025
BS in Computer Science with Minor in Mathematics *GPA: 3.76/4.0*

Experience

LiftOff LLC June 2026 - Aug 2026
Full Stack Software Engineering Intern *Bengaluru, India*

- Contributed to the **modernization of iPourIt's beverage dispensing platform**, migrating functionality from C#/.NET to a Python/Django backend and React/Next.js frontend.
- Developed **React Native/Expo features for the Android Operator App**, including patron tab creation with driver's license scanning, automatic information population, and QR-code-based self-service.
- Developed and shipped a full-stack analytics dashboard using React and Django, integrating Metabase visualizations to **provide Hilton with customer-specific KPIs and operational insights.**
- Resolved bugs in Scan2Pour, addressing incorrect redirects and pours failing to register after navigation, **reducing unintended behavior that could result in lost revenue**.

Quadrant Technologies July 2024 - Aug 2024
Software Engineering Intern *Redmond, WA*

- Led a team in developing **Unity Arcade, a full-stack game-sharing platform** built with Node.js, EJS, and PostgreSQL, embedding Unity WebGL games and enabling users to interact through forums.
- Developed **Azure DevOps CI/CD pipelines using YAML**, automatically building and deploying the Unity Arcade platform when changes were pushed to the main branch.
- Developed and integrated multiple Unity WebGL games, including Hangman and a 2D space shooter, and **created platform features** such as game management, user accounts, and likes/dislikes.
- Implemented **automated unit tests covering core platform functionality**, including user authentication, game uploads, and deletion of games and forum messages.

Projects

Health Finder | *Flask, Scikit Learn, Machine Learning* https://healthfinder.onrender.com

- Developed a web application to help users understand health risks and take preventive action
- Trained machine learning models to predict likelihood of **stroke, Type II diabetes**, and **heart disease**
- Evaluated model performance using precision, recall, and accuracy with an **80:20 train-test split**

Bill Split | *Python, Tesseract-OCR* https://github.com/parthaMalladi/BillSplit

- Built a Python application that extracts text from receipt images using **Tesseract OCR**
- Designed a console-based interface for managing users, items, and shared expenses
- Implemented logic supporting tax allocation, uneven cost distribution, and multiple participants per item

Unity Arcade | *Node.js, Postgres, Unity, Bootstrap* https://unity-arcade.onrender.com

- Built a platform for indie game developers to showcase and host games using **Unity WebGL**
- Implemented a feedback forum to support **developer engagement** and iteration
- Developed a full-stack web application with a dynamic front-end and relational database back-end

Dyslia - Learning App | *Python, Tkinter* https://github.com/parthaMalladi/Dyslia-App

- Developed an application to assist students with **dyslexia** in learning English alphabets and words
- Integrated audio-based navigation and quizzes with user-defined daily learning goals
- UI built using the python library Tkinter. Won the **Wolfram Research Award** at Hack-The-World 2020

Technical Skills

Programming Languages: Python, Java, C++, SQL, JavaScript, C#, HTML/CSS
Frameworks & Libraries: Flask, Express.js, React.js, Bootstrap, Next.js, Django
Data & Machine Learning: Scikit-Learn, Pandas, PyTorch, NumPy
Cloud and Other Tools: Azure, AWS, Git, Unity, Web Sockets, OpenSSL
